Who Are We ?

- Acquired by Fujitsu in Oct 2015
- Founding Team working together for last 15 years (former Sun Microsystems R&D + Execs)
- Created in 2008, based in Grenoble France
- International team (25 Employees)
- 100+ R&D man years invested in UShareSoft product line
- Product line internationalized and localized
- Customers in operation across Asia, Europe and Americas

Locations: France, US, Japan

Partners & Ecosystem

What Are We Solving ?

Machine images are created and managed manually

Limited control of software stacks threatens software governance

Migrating to and from Cloud is not optimal

Application portability difficult
A pre-cursor for hybrid cloud

You cannot harness the full agility of hybrid cloud without fully automated, self-service software onboarding

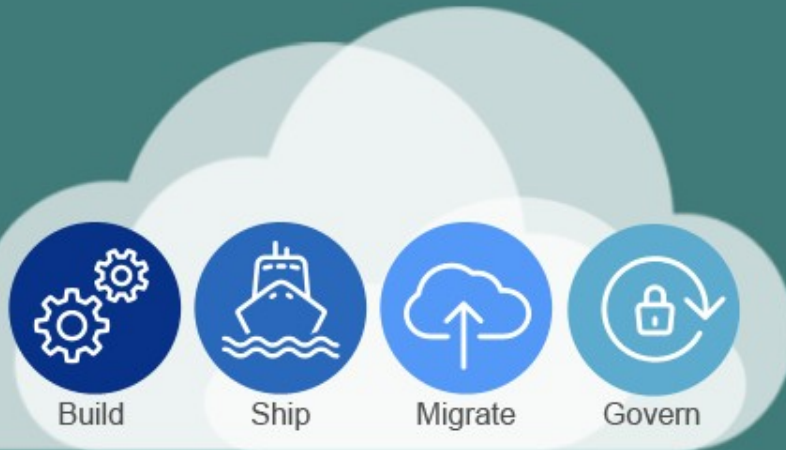

What Are We Providing ?

UForge AppCenter
Any App to Any Cloud

Marketplace
Dynamic Onboarding

Unified DevOps Platform
Build. Ship. Migrate. Govern.

Cloud Ecosystem AppHub Platform

Challenges

- Hybrid Infrastructure
- Manual Machine Image Management
- Slow Boot Times with Base Images

UForge has enabled Zynga to create a repeatable, automated and on-premise image creation platform that has significantly reduced the lead time and qualifications required to build custom images

Alton Lam, Manager Operations, Zynga

Benefits

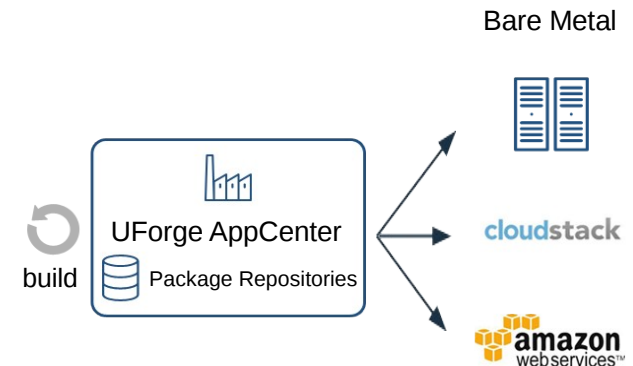

- Faster time to market with applications
- Flexibility to meet peak demands
- Ability to onboard to hybrid environments
- Improved team collaboration
- Software templating and automation
- Automated dependency checking
- Full software governance

Visual Design

Command Line

```
{
  "stack": {
    "name": "myTemplate",
    "version": "1.0",
    "os": {
      "name": "CentOS",
      "version": "8.4",
      "arch": "x86_64",
      "profile": "Minimal"
    }
  }
}
```

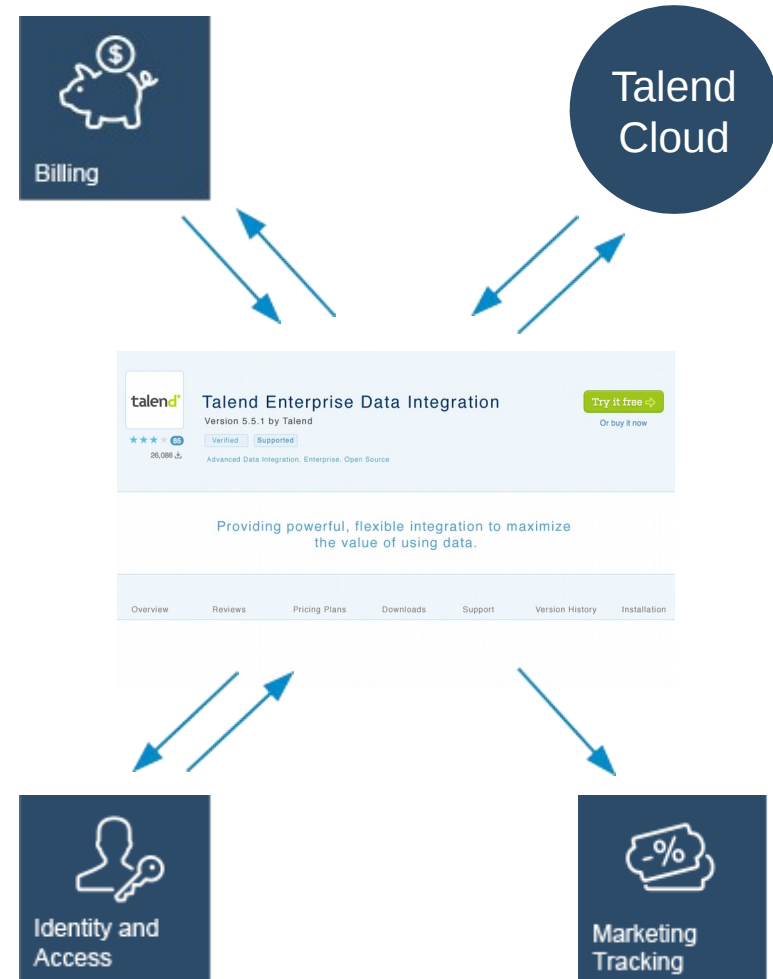

Challenges

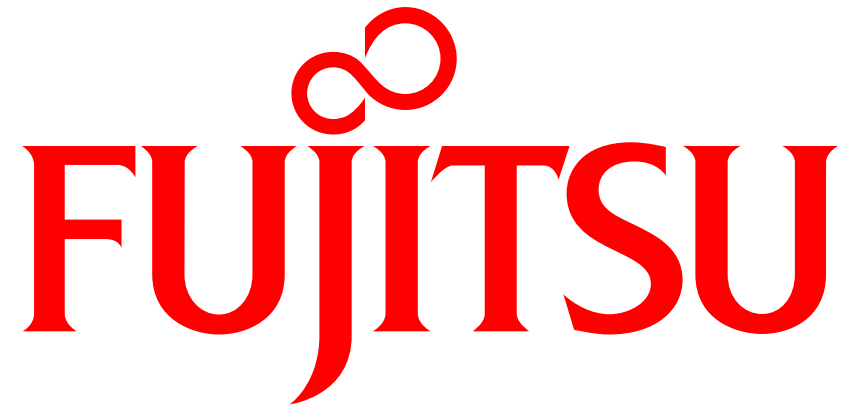

- Self-Service “Vendor” registration and publish 3rd part plugins
- Require to handle multiple versions and compatibility
- Multiple pricing models and support plans
- APIs to integrate with Talend Cloud SaaS Platform

Benefits

- Self-Service Marketplace for partner product items onboarding
- Manage software components, templates, machine images and SaaS (XaaS Marketplace)
- 100% APIs for integrating to SaaS, billing, marketing etc

shaping tomorrow with you
